

REEF BALL FOUNDATION

Restoring Our Ocean's Ecosystems

The Reef Ball Foundation is a nonprofit organization and international environmental NGO. Our mission is to help restore our world's ocean and natural reef ecosystems and to emphasize and protect our natural reef systems through preservation, Reef Ball technology, innovative public education projects, and community involvement.

We work with governments, businesses, schools, research institutes, private individuals and community organizations. The Reef Ball Foundation has conducted projects in over 50 countries worldwide with partner diversity ranging from the Boy Scouts Of America's High Adventure program in Islamorada, Florida to Tsunami restoration in Thailand.

In over a decade of operation Reef Ball organizations have worked on over 3,500 projects worldwide and we have restored over 0.025% of the worlds coral reef systems.
